Full Stack Web Developer with a background in sales and customer service. Recognized for design skills as well as presentation. Excellent interpersonal communication skills and collaborator who works well on a team as well as independently. Great customer service skills, recognized by many customer comments submitted through customer satisfaction surveys. Recognized for proven complex problem solving abilities to contribute effectively as a part of a fast-paced, quality-driven team.

TECHNICAL SKILLS

Node.js, Express, JavaScript, jQuery, React.js, React, JSX, GIT, GitHub, MongoDB, MySQL, Mongoose, Handlebars, HTML5, CSS3, Bootstrap, Bulma, APIs, Heroku, Terminal, AJAX, Restful API, ES6, React Hooks, JSON, Sequelize

RELEVANT EXPERIENCE

Burger Tracker | Full Stack Developer |

Deployed Link: <https://murmuring-sea-84963.herokuapp.com/> | Github Link: <https://github.com/jbouchard13/node-burger-logger>

The Burger Tracker app is a fun way to keep track of burgers the user would like to eat and has eaten.

- **Role:** Created a MySQL database with a custom written orm to handle queries to the database as well as a Node.js server using Express. Rendered the HTML on the server side using Handlebars before sending it back to the user.
- **Tools Utilized:** HTML, CSS, JSON, Handlebars, jQuery, Node.js, Express

Booze and Brews | Full Stack Developer | Deployed Link: <https://lynnboudreau.github.io/ProjectOne/> | Github Link: <https://github.com/LynnBoudreau/ProjectOne>

Booze and Brews is an application to help users either find breweries to drink at, or create their own mixed drinks from home

- **Role:** Created the breweries page. This included handling the jQuery get requests to the third-party API. Using the data that was returned from the search a table was created displaying each brewery's data as well as an instance of Google Maps displaying the breweries respective locations on the map.
- **Tools Utilized:** jQuery, Bulma, Third-party API, CSS, HTML, Google Maps API, JSON

Food Guru | Back End Developer | Deployed Link: <https://arcane-coast-86770.herokuapp.com/> | Github Link: <https://github.com/gavinspotter/project2>

Food Guru is an app that allows users to create their own profile as well as a meal plan. They are able to search for recipes and save them to their plan. Uses authentication to allow each user to have their own plan.

- **Role:** Helped create the server, controllers, and models files in the server folder (Back-End). Set up the MySQL database tables using Sequelize to handle the users and their recipes being saved. Helped set up the API routes using Axios to search for recipe data as well as the routes to save the data to the database.
- **Utilized:** jQuery, MySQL, Sequelize, Heroku, Bootstrap, Server-side API, Express, NodeJS, Axios, CSS, HTTP
